2016/1260/P	Alison Swan Parente	8 Tower Court london WC2H 9 NU	15/04/2016 09:09:44	COMMNT	I would like to object to this application as the granting of it would set a precedence for the installation of air conditioning units in that section of Monmouth Street. Noise from these units would be a substantial nuisance to the residential properties in Tower Court which back on to these shops and anyway, we think that air cooling systems are much more environmental friendly than air conditioning units.
2016/1260/P	Jonathan Taylor	7 Tower Court London WC2H 9NU	14/04/2016 20:47:30	OBJ	This air conditioning unit will back on to, in very close proximity, to our property at Tower Court where we have a rear patio garden. I object to this planning application on the grounds of noise, that it will be clearly visible and unsightly when viewed from our rear patio and rear windows, and in my view it is unnecessary as the property at 48 Monmouth Street already has air conditioning/ventilation in the form of windows. It is difficult to comment on the security system without more detailed information. How do we get this without a site plan/drawings on this site?
