2016/1974/L	Alison Swan parente	8 Tower Court London WC2H 9NU	15/04/2016 09:01:50	COMMNT	We live in Tower Court behind this section of Monmouth street and would be directly affected by the noise produced by the installation of Air conditioning units in shops behind us. We think that air cooling systems are more environmentally friendly and less of a nuisance to neighbours. If this application is granted this will open the door to all the other shops in the street making applications. If these too were granted, this would have a very detrimental effect on the quality of life of those living in residential properties behind. Thanks for yr attention.
2016/1974/L	Jonathan Taylor	7 Tower Court London WC2H 9NU	14/04/2016 20:56:04	OBJ	I object to this planning application on the grounds of: 1. The air-conditioning unit will be in very close proximity to our rear patio garden 2. The unit(s) will be noisy and will cause us a disturbance particularly as our house is grade II listed and as a result do not have double glazing. 3. An air conditioning unit will be clearly visible (and unsightly) from our rear patio garden and the rear windows of our property 4. The air conditioning unit is unnecessary given the climate in London and the fact that ventilation to 48 Monmouth Street is already available vis the existing windows
