

Zenab

Many thanks for your time today

As we discussed, the residents of the local area are very concerned about the traffic impact of the school proposal on local streets and the whole of Hampstead given its location and scale of 420 children and 60 or so staff. They are also concerned about the Heritage aspects of the proposal given it is a listed building in a conservation area.

We are getting together our views on Traffic, Heritage, Educational Need (given the revised catchment area) and noise and many thanks for giving us another week to get all this done. Much appreciated.

By the way the school have now replied to my old letters asking to discuss the plans but with the planning application already in and the plans/scale being led by the EFA, over which the school have no sway, it seems pointless now.

Will stay in touch and thank you again for your time

Stephen
