2016/17637L	Mark Neal	Flat 56 30 Oval Road London NW1 7DE	20/04/2016 13:48:58	INT	Document repeatedly refers to "Please see cover letter." and does not provide enough details of the proposal to know how it could affect those in the buildings shadow.  How are neighbours to know how this will affect the top of the building, skyline and water tower visually? Or the effects on all sorts of neighbouring domestic radio receptions?
2016/17637L	Mark Neal	Flat 56 30 Oval Road London NW1 7DE	20/04/2016 14:09:22	INT	My previous comment is less valid, as I see now that Application No: 2016/15997P has much more detailed documentation, shouldn't they both have full documentation?. Having read the further information, it seem that they are relatively small aerials next to the big satellite dishes in the roof area, however they seem to be for spreading wi-fi to both the interchange and camden market, and I think that it should be questioned if this can impact the quality of domestic wi-fi in neighbouring homes, if this is a wide area booster for their wi-fi network, could it swamp and reduce domestic wi-fi quality? As it stands the wi-fi bandwidth is dominated and congested with interchange and camden market wi-fi
