---

Dear Mr. Freeney,

I welcome this application and urge you to approve it. I do not want this matter to become another saga like Pizza Express and Castle public house where nothing has been achieved except decay. This proposal is the southern gateway to Kentish Town visible in long views particularly from Prince of Wales Road which I believe it enhances. It also provides much needed modern mixed use accommodation which is to the benefit of Kentish Town. I do not believe that no new building should be no higher than those either side otherwise we would still be in mud huts. The height and appearance of the proposal fits in well so it should be approved without delay and with the minimum of conditions.

Yours sincerely,  
Robert A Livock
