3. Description of the Proposal

Please describe the proposed development including any change of use:

We would like to make the following two alterations to our flat:

1) change of concertina doors leading out to the third floor roof terrace

We would like to change the doors leading out to the third floor roof terrace to a set of uPVC doors. The roof terrace is part of a loft conversion done in 2008. The current set of concertina doors in timber are not suited to withstand the weather that these doors are exposed to. This show in the decay of the rotten timber. We therefore propose to change these doors to uPVC doors which mirror the current look of the existing doors. The roof terrace is facing the back of the building and the next street and dwelling with a view on the roof terrace is over 50 meters away. Therefore no change would be visible from the outside.

change of single glazed windows on the second floor right hand side room facing the street
 We would like to change the current set of windows in the second floor right hand side room facing the street. The current set of windows are single glazed. For reasons of better isolation we would like to change them into double glazed windows keeping the same appearance and timber frame.

Has the building, work or change of use already started?
