| 2016/0695/P | Karen Yoong | 26C Frogna London NW3 6AG | 24/04/2016 11:01:38 | COMMNT | I have reviewed the neighbouring property's planning application. I understand the neighbour's desire to extend his/her property to create more living space. Works which are as extensive as the ones contemplated disrupt and affect the enjoyment of my neighbouring property at 26C Frogna. There will be great deal of noise, and also the increased presence of builders in the area, and non-residents, which could materially impact the security and the safety of the neighbours. especially those with flats which are left unoccupied during the day. The extended roof next door to my property will also allow easier access over the existing boundary wall to 26A, and easier access to 26B and 26C to burglars. I request that the Council consider this application carefully and the potential disruption to the residents of 26 Frogna, and safety of our building. Further, in the past the works to 24 have taken many months, and the noise will affect neighbours for a long period, during the weekdays as well as during the weekends. Please consider these issues carefully before granting the application approval. |
