The bordinate to th	ng extension both in connection with providing n advice stated that the existing valley roof and pre-application advice also stated that second e existing building. Both of these proposals we have reduced the proposed number of units in

The pre-application also advised that the first floor closet wing extension should be reduced in scale and height in order to remain subordinate to the existing building and similar in nature to the existing closet wing extension to No 67. This advice has been followed, and the proposed first floor closet wing extension is now much lower and smaller in scale, and sits well with the existing property and the adjoining building.

The pre-application advised reducing the depth of the rear extension, which has been done. The proposal is now only 620mm deeper than the extension at No71 and 1200mm shorter than the extension at No67.

The pre-application advised bringing the new unit in the garden back towards the existing property so that it was an extension from the existing property and that there was no gap between them. This advice has been followed and allowed us to reduce the buildings projection.

The pre-application suggested using a Juliette balcony to the rear of the unit in the garden rather than a full balcony, which has been done.

The pre-application advised that the units are required to meet Technical Housing Standards and Housing Design Guide minimum internal spaces, which have been incorporated into the scheme. Please see Design and Access statement for further information.

The pre-application advised using a green roof in order to improve the resulting environment of the site, which has been done.

The pre-application advised that a screening assessment BIA is required on submission of the planning application, which is being undertaken and will follow as an additional document as soon as this is prepared.
