TYPICAL PILASTER

GENERAL NOTES

Drawing to be read in conjunction with all information by architects, structural engineer & service consultants.

The contractor is not to scale from this drawing. All written dimensions to be checked on site before work commences. Discrepancies, where identified, must be reported to the architect immediately.

This drawing is the property of Latitude Architects and Designers and must not be reproduced or disclosed to any unauthorised person either wholly or in part without written consent.

NOTES:

Pilaster detail to be replicated by taking mould of the existing pilaster stored on site. Existing pilaster to be cleaned and restored to provide adequate detail for mould.

All dimensions are indicative and are to be measured for each location on site by the SC

All sizes are indicative at present.
The width of the bays vary throughout the building.
Level of detail and dimensions to be confirmed on site by the SC in agreement with the architect.

Timber cornice:
Timber to be external grade European softwood or similar.
Timber grade to be min J30 in accordance to BS EN 14220:2006.
Timber preservative treatment to be in accordance with BS EN 942.
External arrisses to be softened by a 2mm. edge.
