2016/2061/P	Seda Zirek	90 Torriano Avenue Basement Flat nw5 2se	06/05/2016 15:49:14	OBJ	<p>Dear Sir/Madam,</p> <p>Unfortunately, we have to object this application due to loss of light. We live in a basement flat that will loose at least two hours of direct sunlight if this proposal is built. The proposed extension is on the south side of our building. As you can understand direct sunlight is an important matter for a basement flat that lacks so much of it.</p> <p>As a suggestion, if you build the proposed extension half- size, if the facade of the extension is recessed certain amount from the facade of the ground floor flat; this won't create any loss of light on our side.</p> <p>Kind regards,</p>
