2016/1190/P	Sean Titley	73a Roderick Road London NW3 2NP	10/05/2016 07:39:57	COMMNT	<p>These are concerns not objections.</p> <ol style="list-style-type: none">1) I am concerned about the structural impacts of the conversion on the building. I understand that this will be covered by the work of the surveyor after planning permission has been granted.2) That the conversion is in keeping with the local area e.g materials are consistent or complementary to the rest of the building.3) Guaranteeing safety during the building process and after and light of those living in the flats below.4) It is unclear how long the work will take and how much disturbance there will be to the flats below and I would prefer this minimised.5) I understand that the Freeholder and the Insurance company are happy for this to go ahead with no implications for insurance premiums etc. <p>The applicant and I have discussed this amicably; this is just to register my concerns officially so they are taken into account during the planning process. I live in the bottom flat.</p>
