2016/1757/P	Vivien Marsh	44 Hatton Garden Flat 7 London EC1N 8ER	10/05/2016 16:15:45	OBJ	<p>This is not a 'replacement' base station, since it was previously on another building. You are proposing to site a new (to us) mobile phone/comms station on top of 6 floors of residential accommodation, and right above people's bedrooms. Also, there is no indication what disruption there would be to our existing satellite dish, terrestrial digital aerials or mobile phone reception within the building (including on other providers). You do not need to fry local residents with radiation: there are plenty of other buildings that are commercial use only, and are occupied for many fewer hours per day by human beings. I note that you have not received replies from many of the addresses you contacted: I suggest you try a little harder to locate their owners. In summary: not on a residential building, please, and not so close to where we sleep.</p>
