The Cycle Storage Specialists

Sheffield Stands & Variations

secure | innovative | stylish

Overview

The Sheffield-style stand is the simplest and most common type of bike parking. It is easy to use, familiar, and well suited to installation in public spaces. Each rack is firmly anchored to the ground and provides a secure locking point for two bikes. Cycle-Works racks offer a choice of high quality materials, finishes and mounting options. Some racks can also have a logo laser cut into the design to match local identity or brand.

Secure and Easy to Use

Cycle-Works offers a horizontal security bar either as an option or an integrated part of all of its racks and we strongly recommend that these are always fitted. The security bar adds strength to the rack and can prevent the bike lock from being manipulated down to ground level where it can easily be attacked.

Safety Pin

Works where space is limited & an interesting design is required.

[more info](#)

Big Heart

Tough Love's big brother made from 60mm diameter tube.

Sheffield Stands & Variations

Mounting Options

Toast Rack

Racks are supplied welded to metal rails and bolted to the ground using 110mm bolts. Toast racks can easily be moved if required.

Surface Mounted

Surface mounted racks are bolted to good quality concrete using 100mm bolts.

Embedded

Racks can be embedded into concrete to a depth of 300mm. The legs of the rack are fitted with a lip or peg to prevent lifting.

Securing Your Bike

Ideally the bike frame and both wheels should be locked to the stand with two locks. If only one lock is available it is recommended that this is used to secure the front wheel (as this is the easiest to remove) and the frame to the stand.

Locks should pass through the stand above the locking bar or through any locking points cut into the security bar. Remember to remove accessories, such as lights, from your bike.

Dimensions & Spacing

In order to achieve the best use of space without making the racks difficult to use it is vital to carefully consider the spacing of your racks. These guidelines should help you.

Measurements given here are for a single row of racks. If you are installing multiple rows then the minimum spacing between side-by-side racks should be increased from 75cm to 1000cm to allow users to wheel bikes between racks.

Sheffield Stands & Variations

Materials

Stainless Steel

Stainless steel gives a beautiful non rusting polished finish that looks great in all surroundings. We recommend Marine grade 316 stainless steel, but other grades are also available. Stainless Steel is also easy to recycle and has an approximate recycled content of 60%.

Code for Sustainable Homes

All our lockers, shelters and racks they can be used to help contribute towards gaining your 2 ENE8 Cycle Storage Credits when used in an appropriate situation, under the Code for Sustainable Homes. [more info](#)

Galvanised and Nylon-Coated

An excellent long-lasting finish that won't damage a bike's paintwork. This finish is available in most RAL colours. The rack is galvanised before being coated to provide maximum protection against corrosion.

BREEAM

All our lockers, shelters and racks they can be used to help demonstrate compliance with BREEAM and achieve a high BREEAM rating when used in an appropriate situation.* [more info](#)

Galvanised

This low cost finish gives effective corrosion protection for ten to fifteen years. The look is industrial and utilitarian. Galvanised products can easily be re-galvanised, this greatly increases the overall life of the product and value. It is also easy to recycle and is made from recycled materials.

About Cycle-Works

Cycling is our passion. We believe that cycling is good for people, good for society and good for the environment. This belief underpins everything we do. We believe that the provision of quality facilities will increase the use and acceptance of the bicycle.

All our employees and associates cycle regularly in diverse disciplines such as commuting, touring and long distance audax rides. We are active in both local and national cycle campaigning.

Our Products

- Individual bicycle lockers
- High capacity 2-tier racks
- Open access and lockable shelters
- Wide range of individual racks
- Vertical and horizontal racks

Our Services

- Initial site visits
- Advice on product selection
- Consultation on your plans
- Full delivery and installation
- Aftercare and maintenance
