

Treework Application Additional Information

173 Gloucester Avenue, Primrose Hill, London

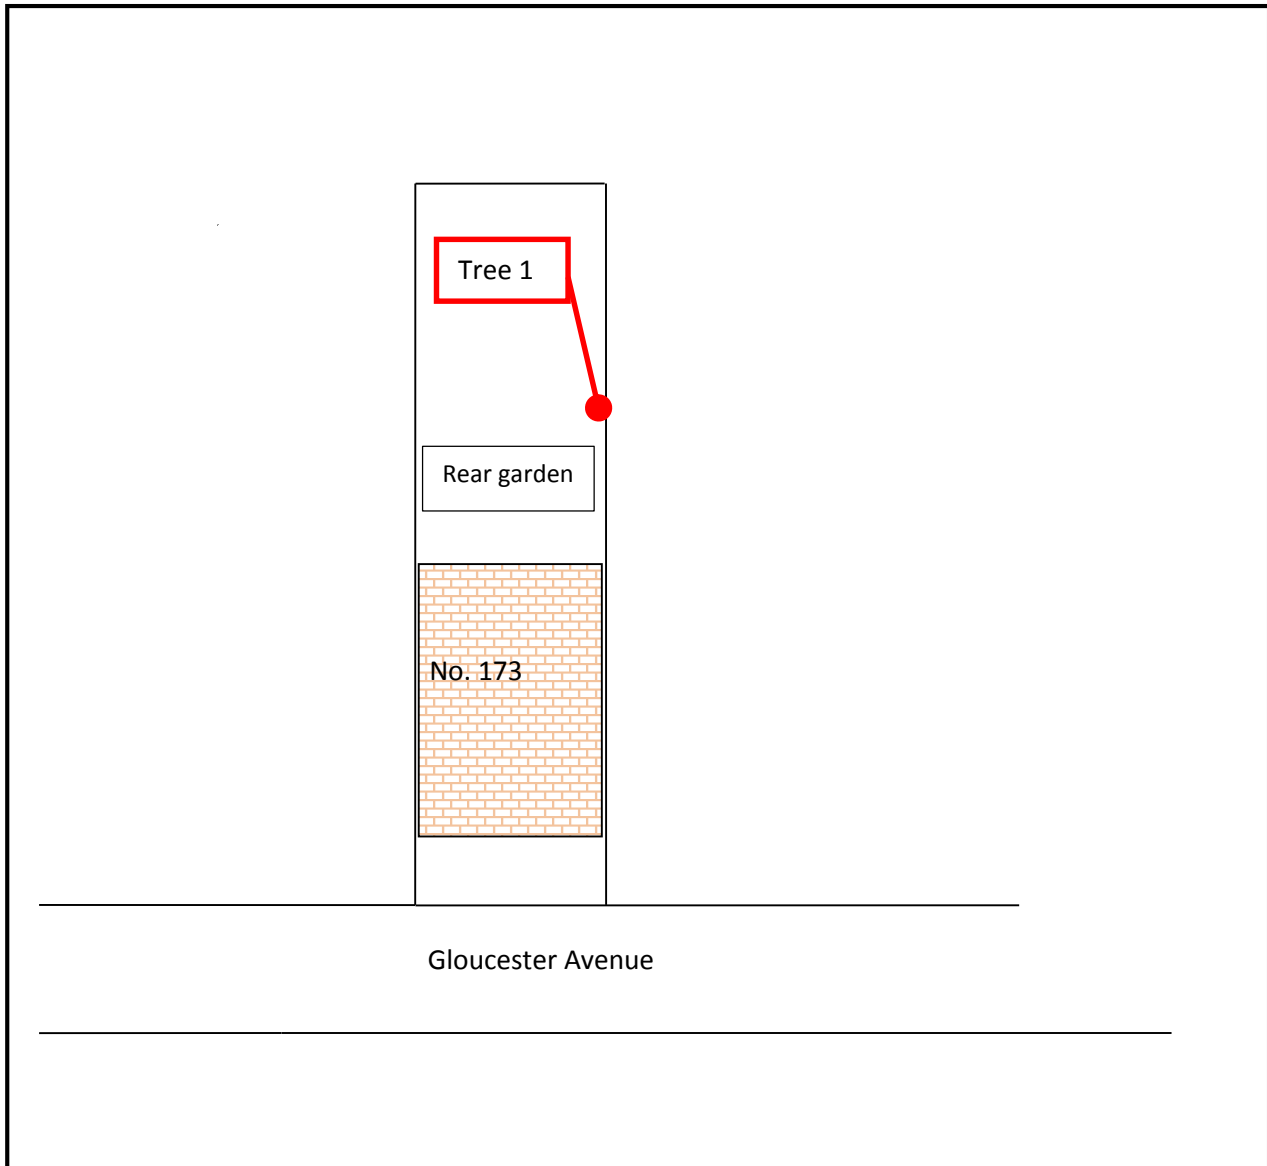

I carried out the site visit on 18 April 2016 in the presence of Ms Coleman, the tree owner. All my observations were from ground level without detailed investigations and I estimated all dimensions unless otherwise indicated. The weather at the time of inspection was still and dry, with good visibility.

I was asked to inspect one tree and comment on its condition and the potential to have it removed. I inspected the tree and have indicated the numbering on the site plan extract enclosed as sketch plan BT1. This plan is for illustrative purposes only and no measurements should be scaled from it. My observations, comments and recommendations are summarised in the attached table.

Please contact me if you require any further clarification on any of these points.

Sketch plan BT1 illustrating tree location and numbering (not to scale)

Tree No	Species	Description of proposed work	Reasons for carrying out the proposed work
1	Ginkgo	<ul style="list-style-type: none"> <li data-bbox="465 264 546 288">• Fell 	<p>The reason for this work is that the tree is in poor condition due to its double leader. It is also a tree that the owner does not want to retain in the garden when it is landscaped in the future. The tree roots have previously (4 years ago) been identified causing damage to drains. However, we do not have any documentary proof.</p>
