2016/2673/T	David South	29 Stratford Villas	16/05/2016 09:35:04	OBJ	<p>I live at 29 Stratford Villas and my flank wall is the end of 53 Camden Square.</p> <p>I strongly object to the felling of the three (?) Silver Birch Trees. I say three as there are in fact four trunks which two appear to share a common root while the other two are 1.5 to 2 metres apart.</p> <p>My main objection is that previous owners at 53 grew similar trees and then remove them which caused subsidence to my property and a thirty thousand pound insurance claim. I do not want to risk repeating this experience again.</p> <p>My next question is why the request to fell these beautiful and healthy trees has been made. The occupants have told another set of neighbours that the request has been made so as to replace an existing trellis. The damage to the trellis is a combination of age and a ceanothus also growing in their garden. This therefore leaves me suspicious of an ulterior motive.</p> <p>Finally the applicants have not indicated what tree(s) they intend to replace the Silver birch trees with should their application be upheld.</p>
2016/2673/T	Nicholas Jordan	38 Stratford Villas NW1 9SG	16/05/2016 10:39:23	OBJ	<p>I Live at 38 Stratford Villas. The garden of 53 Camden Square is directly opposite my house. One of the main reasons that we bought our house was the beautiful, unbuilt and green view from our front windows. The tree(s) in question for this application hide the buildings opposite and further down our street from our view. I have grave concerns that felling the trees will impact on this beautiful view and also the value of our property as the green in front is a unique feature. As such I oppose this application</p>
