

Supporting Technical Information for

CTIL

(Oval Road NW1 CSR 41812)

CSR 41812 will improve the 3G (U9 and U21) & 4G (L800) coverage & capacity. 041812 will cover the area around Camden town station and surrounding areas. 41812 is a very good option. This site is also the only option we currently have and is in a good location, there are massive coverage & capacity issues within the Telefonica network around this area, this option will really help the network in this region.

Date Prepared: 4th August 2014

The logo for CTIL, consisting of the letters 'CTIL' in a bold, stylized, sans-serif font. The letters are white with a dark outline, and they are set against a dark, rounded rectangular background.

KEY TO COVERAGE PLOTS

The enclosed radio propagation plots are based on Ordnance Survey geographical information.

The level of coverage provided by a particular site is dependant on a number of variables. The main factors which determine the extent of coverage are: the frequency of the signal emitted, the height of the antenna above ground level, the characteristics of the surrounding topography and the type and occurrence of ground clutter such as buildings and trees which can cause 'shadows' or reflections and can absorb the signal.

The Radio Planners have produced accurate visual representations of the level of coverage available in this particular area by using advanced computer modelling software based on a Geographical Information System. The programme takes the numerous variables as above into account and can then calculate and plot the strength of the signal.

Existing and proposed sites are indicated by a blue or red circle and dot with the site number. The orientation of the antennas is shown by the arrows.

Site arrows show orientation of antennas

Note on large rooftop sites the antenna can be distributed in different locations from the site location. This is represented by a line extending outwards from the site to the antenna.

Key for UMTS (3G) Plots

Pink	Sufficient signal strength to provide adequate service for indoor use of a hand portable mobile in urban areas.	Indoor Dense Urban
Orange	Sufficient signal strength to provide adequate service for indoor use of a hand portable mobile in suburban areas.	Indoor Urban
Blue	Sufficient signal strength to provide adequate service for indoor use of a hand portable mobile in suburban areas.	Indoor Suburban
Green	Sufficient signal strength to provide adequate service for use of a hand portable mobile in a car.	In Car
Yellow	Sufficient signal strength to provide adequate service for outdoor use of a hand portable mobile.	Outdoor
No Colour	Insufficient signal strength to provide reliable service.	No Coverage

CTIL – Map of required Coverage Area

CTIL - Existing UMTS Telefonica (3G) Coverage

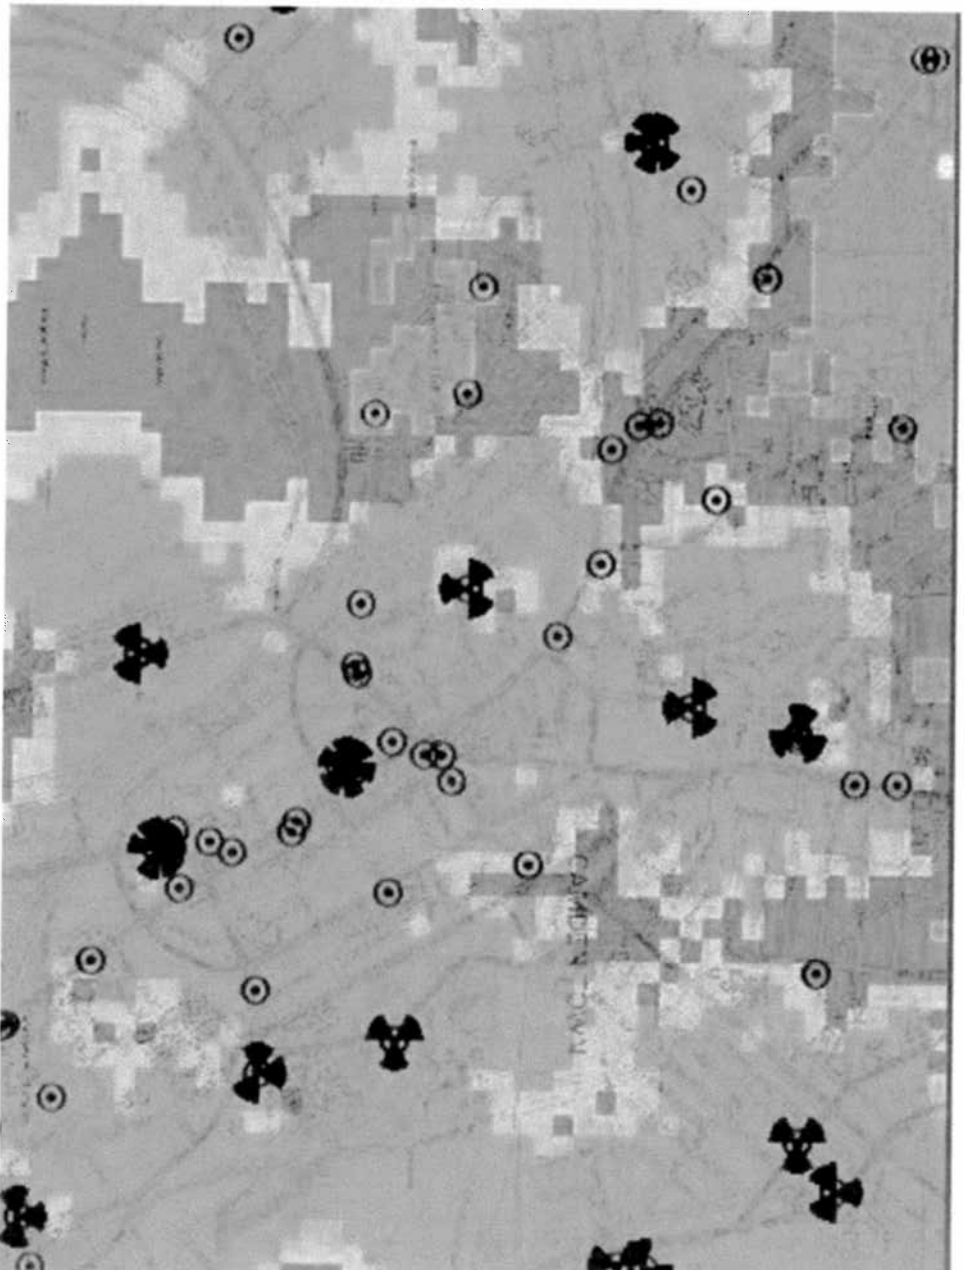

3G Coverage by Signal Level	
	Indoor Dense Urban
	Indoor Urban
	Indoor Suburban
	In Car
	Outdoor
