2016/2265/P	Fiona Clarke	17a Mralborough Rd London	19/05/2016 08:32:37	COMMNT	I think it's great that Camden are promoting science and are building labs across the borough. The design is innovative but not too 'modern'. It will enhance the view from Fortress Road. I like the triangular raised roof which will let light into the building. I think it's great that people will know that science is happening behind the huge brick wall!!
2016/2265/P	Elena Ana Irimie	20 Kingsbridge Drive London NW7 1HN	18/05/2016 20:10:13	COMMNT	Eleanor Palmer Primary School's plan of building a science lab is an exceptional good idea and would only contribute to the enhancement of the children's knowledge and the community around this school. For a school such as Eleanor Palmer rated outstanding and the quality and dedication of the teachers, this project is something that would only allow the school to develop even further and offer even better experience for the children learning in it. The future of the children is based on a good and solid knowledge of science. I trust that the council does understand the benefit of the science lab and shall approve the project.
2016/2265/P	Nimish Shah	Flat 5 Cotton House 93 Fortress Road London NW5 1AG	18/05/2016 11:08:12	COMMNT	<p>The Children at Eleanor Palmer will benefit immensely from having and using a science lab. It raises the status and love of science for every child attending, which is great for their future, and provides them with opportunities which are mainly reserved for those attending Private schools.</p> <p>The building will in fact improve this area in the following ways:</p> <p>By improving the look of the school on the West Wall, which will in turn give the community an uplifting new space to pass by rather than yet another brick wall in the city.</p> <p>It will utilise the current rusty shelter more advantageously, enabling children, a calm peaceful space, to learn, thrive, and be challenged, rather than leaving this space empty and without any use.</p> <p>In summary, the benefits for the Children and the wider community outweigh any current obstacles.</p> <p>Let's focus on the Children and their future, and enable Eleanor Palmer to have their science lab!</p>
2016/2265/P	Bandini Shah	Flat 5 Cotton House 93 Fortress Road NW5 1AG	18/05/2016 11:05:18	COMMNT	
2016/2265/P	James & Lisa Gregory	63 Leverton street London nw5 2nx nw5 2nx nw5 2nx	18/05/2016 23:44:27	SUPPRT	<p>We think this would be an excellent addition to the school campus, and would replace the rather tired and useless existing structure.</p> <p>We also feel it would enhance the "look" from Fortress Road and improve the area generally.</p>
2016/2265/P	Margery Teague	28 mercers road London N19 4PJ	18/05/2016 21:14:38	NOBJ	I am in favour because the new lab building will be a huge improvement on the existing shelter on the site that is leaking and unused, as well as being a great design which will encourage children to engage with science and technology.

2016/2265/P	Rebecca Perrett	121 Lady Margaret Road LONDON N19 5ER	18/05/2016 20:40:41	SUPPRT	<p>I completely support this project. It will not only support and encourage our children and future children's education but also improves the schools appearance with a wonderful high quality building. To not encourage and support the people behind Eleanor Palmer in this wonderful project would be a terrible mistake!</p>
