- Director Mr Mustafa Simsek can confirm that the shutter in question was part of the whole building refurbishment. Shutter was put up in May 2010. Which confirms the shutter was up more than four years that is needed in order for it to stay in place.
- A statutory declaration can be provided by director if needed.
- Architects on Martin Evans 020 7729 2474 who designed the building can also confirm when the building was built.

Main evidence below, shows a picture of the shutter being up on May 2012. Although it's short of the four years needed by google, it's clear that shutter was put up much earlier:
