Years

# Model GF

## Mesh Grease Filters

### Aluminium Frame

## GENERAL DESCRIPTION

These filters are designed for use in commercial kitchens and ventilation from food preparation areas where their primary function is to reduce grease carry over from the cooking area. These Filters are rated at 1.5m/sec - where the pressure drop is 15Pa for 45mm filters and less than 10Pa for 20mm filters.

## Construction

These filters are manufactured by rolling a metal frame which holds a series of expanded and corrugated metal layers. These layers create an impingement barrier which catches grease from the extract air.

## Features

- Aluminium Frame
- Strong rolled frame construction
- Scratch Free outer surface
- Fold down handles
- Drain Holes
- Low Pressure Drop
- Ex-Stock Delivery

## Material Options

- Type GFS - Stainless Frame and Mesh
- Type GF - Aluminium Frame and Galvanised Steel mesh
- Type GFSE - Stainless Frame and Galvanised Steel mesh

# STANDARD SIZES

Jasun Envirocare always specify filters as Height (H) x Width (W) This is particularly important with baffle filters because the handles will always go on the H edge, the blades will always run along the H edge, and the drain holes will always be in the W edge

H

W

No.	Nominal Size Inches	Height (mm)	Width (mm)	Depth (mm)	Rated Airflow m <sup>3</sup> /hr
