Drawing No: CCL 09261 / TCP Rev: 1
 Title: Tree Constraints Plan (Existing Layout)
 Site: Abacus Belisize Primary School NW3 1PD
 Scale: 1:200 Paper Size: A1

Tree Retention Categories (Rev: 1)

- Category A tree** (Green circle): Trees of high quality with an estimated life expectancy of 40+ years. Usually large trees with significant presence or smaller trees with excellent form. Retention of these trees is highly desirable.
- Category B tree** (Blue circle): Trees of moderate quality with a life expectancy of 20+ years. Usually maturing trees or younger trees with good form. Retention of these trees is desirable though less than Category A trees.
- Category C tree** (Grey circle): Unremarkable trees of low quality and merit. Individual specimens are not considered to be a material planning consideration.
- Category U tree** (Red circle): Trees unsuitable for retention due to their very poor condition.

Tree Constraints Plan

BS 5837 Root Protection Area (radius = 1xstem diameter)
 Root Protection Area needing amendment due to site conditions, e.g. presence of existing road or building.
 Root Protection Area having been amended to account for site conditions

T1 = Tree No 1 G2 = Group No 2 H3 = Hedge No 3

 MN = Measured North:
 Canopy spreads are sometimes measured to an approximate N defined by site features. Often more accurate, especially where rows of trees are not aligned N-S or E-W.
