I object to this application because of the following. as it is we are getting disturbed by the noise outside form the outside seating area. People are wandering off with alcohol drinks on to the public highway. Glass and bottles are being left around and also thrown into the canal causing poison to the local wild life. Any in cress in the area or capacity will cause issues for the residence and locals. Its difficult for the establishment to control the people wondering off with drinks. We do not disagree with the hand rails but we do disagree with the in cress in capacity and the hours should not be increased as this will cause more disruption. And there should be no music played out side at all.
