Reason: For the avoidance of doubt and in the interest of proper planning.

Informative(s):

- 1 The raising of the building height by approximately 0.9m is not considered to harm the appearance of the building or the character of the surrounding conservation area particularly as only 350mm of the increased height would be visible at street level. Similarly, the increased footprint of the proposed basement by approximately

6% is not considered to be materially different to that approved in the original scheme. Permission is also sought to amend fenestration at ground floor level to the Parker Street elevation. Given these amendments are not materially different to the existing arrangement no objection is raised. The proposed amendment are considered to be non-material in the context of the original scheme and does not raise any new issues or alter the substance of the approved development.

The full impact of the proposed development has already been assessed by virtue of the previous approval granted on 30/08/2013 under reference number 2012/6132/P. In the context of the permitted scheme, it is not considered that the amendment would have any material effect on the approved development.

- 2 You are advised that this decision relates only to the changes highlighted on the plans and set out in the description and shall only be read in the context of the substantive permission granted on 30/08/13 under reference number 2012/6132/P and 2012/6143/C and is bound by all the conditions and obligations attached to that permission

In dealing with the application, the Council has sought to work with the applicant in a positive and proactive way in accordance with paragraphs 186 and 187 of the National Planning Policy Framework.

Yours faithfully

Rachel Stopard  
Director of Supporting Communities
