2016/2413/P	Rachel Wrangham	20 Rochester Square London NW1 9SA	22/05/2016 09:31:18	COMMNT	<p>I object to this proposal on three grounds.</p> <ol style="list-style-type: none"><li>1. Air conditioning is entirely unnecessary and unsuitable for this sort of house, which just needs excellent insulation and draught-proofing. A combination of 'space blanket' and Kingspan insulation is practical within the available space, and highly effective.</li><li>2. Air conditioning is very energy intensive. Climate concerns mean that Camden residents must play their part in reducing emissions; Camden needs to insist on this through the planning process.</li><li>3. Air conditioning, even within an acoustic enclosure, is noisy.</li></ol>
