2016/1791/P	Julian de Metz	St Annes close	02/06/2016 09:40:40	COMMNT	I have only ticked objection to distinguish my comment from the many in full support of the proposals as there is no option to support with comments. I think it's a good idea, but comment that the westerly end of the array could be simplified and the panels arranged in a neat, symmetrical rectangle. I understand that the design will have been developed to maximise efficiency but since this is an important listed building, it would be sensible to include a condition requiring detailed setting out. We do see this every day as we live in st Annes close. Otherwise, I support the proposal.
