Response: OBJECTION TO EARLY DEMOLITION BEFORE FULL DETAILS ARE KNOWN & APPROVED

Please note that I object to the idea that we all suffer from the demolition of the current buildings, ensuing traffic restrictions, visual blight etc before the necessary engineering investigations into the safety of the projected tower above the Jubilee Line have been done, considered and agreed by TIL and passed by Camden Council.

I do, in fact, object to the whole of the tower project but, especially, to the rush to disadvantage the local community by demolishing the current buildings without fully calculated and agreed plans.

Elsworthy Residents Association objects to any application for amendments to the application at 100 Avenue Road that might allow demolition prior to all the details for construction below and above ground being finalised and permission granted.

I object to this variation as it needlessly preempts other planning decisions and in his decision to approve the 24 storey tower, the Inspector made a condition [No.3.] that no demolition or above or below ground development can commence until full detailed plans for the foundation works have been submitted by Essential Living, agreed by TH, and approved by Camden Council.
