| 2016/1815/P | Barbara Jackson | 5A Belsize Crescent London NW3 5QY | 07/06/2016 20:14:33 | OBJ | Re impact of excavation my concerns are:- 1. Subsidence. This building is in a known area of subsidence. 2. The upset and/or interference with the local water table 3. The downward extension of the existing basement within a building built on a hill. 4. The impact of considerable noise from plant equipment over an extended period of time. |
