2016/2844/P	Nicholas Fry	57 Upper Park Road	07/06/2016 13:06:58	INT	As a freeholder of one of the properties backing onto the mews I am in favour of the installation of a gate to counter the problem of unauthorised parking in the mews.
2016/2844/P	Alan Margolis	61 Upper Park Road NW3 2UL	07/06/2016 09:34:21	INT	I greatly support this application as it will reduce rubbish dumping and stop unauthorised vehicles being being left which have been restricting access to our garages and own property.
2016/2844/P	Sidney Heldt	69 Upper Park Road	07/06/2016 16:46:58	COMMENT	As, a resident in upper park rd, I agree with the above planning application..
2016/2844/P	James and Victoria Twining	24 Lawn Road NW3 2XR	07/06/2016 16:07:47	NOOBJEMP ER	As a resident of Lawn Road whose house backs onto this private mews I am writing in support of this planning application. The mews is private land belonging to the freeholders of each of the properties which back onto it. The lack of a gate / barrier has led to a vast significant and increasing number of instances of non residents / freeholders illegally parking on the mews, impeding access and blocking access to the garages. Further there have been increasing instances of people fly-tipping on the mews. Finally there have been examples of people engaging in sexual activity in cars parking on the mews at night - I have reported one such instance to the police myself. The erection of the gate / barrier would have no detrimental impact on any other Camden resident and would prevent people illegally parking and fly-tipping on this private land while allowing freeholders and residents of the houses backing onto it full access. This would immeasurably increase the amenity of the mews to the residents / freeholders with no negative impact on the local community. We would therefore urge you to accept this proposal.
