2016/2803/P	Natasha Harvey	Flat 5 130 Fellows Road NW3 3JH	10/06/2016 08:35:25	COMMNT	I am 100% vehemently against this proposed work. I have already voted against it, and do not understand when there is such strong objection to this from locals, why this has been overruled - and here we are again! As a resident of Fellows Road, I have already suffered the building noise and inconveniences attached to 2 very large high rise buildings being built in Avenue road and the area is starting to look like New York. There is already no parking for residents and more residents will mean more difficulty for me trying to find somewhere to park. With a bad back and heavy shopping, walking a long distance because I can't park near my flat is no joke! I would not object to a small building, but 24 storeys - no way!
2016/2803/P	G KHANNA	FLAT 103 REGENCY LODGE ADELAIDE ROAD NW3 5EB NW3 5EB NW3 5EB	10/06/2016 02:20:24	COMMNT	The area is already overly congested, and new builds are not supposed to be allowed parking permits - parking would further congest the area. Construction of this scale would massively disrupt the area for too long - which arrangements have been made to deal with this? It is unreasonable for the other residents to be expected to put up with this.
2016/2803/P	karin fernald	2 Daleham Mews NW35DB	09/06/2016 09:56:09	COMMNT	This 24 storey building, if built, will be the death of Swiss Cottage. It will eliminate the current protection of our valuable green space from the highly polluted main road. And visually it is much too high. It is in no way what this area needs. And to demolish the current, well designed building when it is not certain that the new one will be built will condemn the area to a semi- permanent, vast building site. Please, dear Camden, refuse this ruinous scheme and Essential Living's current ploy..
