

30 Princess Road NW1 8JW

Noise and Vibration Action Plan

On receipt of a noise or vibration alert, the following protocol will be triggered:

- 1. The Contractor will identify the source of the noise or vibration that triggered the alert. Work involving that source ('the work') will be stopped;*
- 2. If no practicable means can be identified by which the risk of recurrence can be averted the work causing the noise or vibration will be resumed under supervision and with the greatest possible care;*
- 3. Following the resumption of the work, the Contractor will complete an incident report setting out the time of occurrence of the alert, the incident or work or machine that caused it, the result of any inspection of the building fabric, the conclusion of the method and machinery best practicable means review, the measures taken to minimise the risk of recurrence of the vibration and the time of resumption of the work. The incident report will be circulated to relevant parties.*
