Date: 10th June 2016

Quotation Ref: 104129

To: Annabel Brown Architects

Address: 30 Princes Road, Primrose Hill NW1 8JL

Dear Annabel

Thank you for your enquiry with regards to a proposed rodent riddance treatment at your property. The brief is as follows:

. 'Outdoor surface test baiting must take place a minimum of 28 days before works commence with regular inspection and replenishment of baits as necessary. Complete destruction must be demonstrated by no new takes of bait in the 7 days before works commence. The CMP must also commit to ensure drainage is suitably capped or sealed during the works to prevent egress from the drainage system'

Recommendation

I propose that four rodent baiting visits be undertaken to both confirm and if necessary bring infestation under control. All rodent-monitoring points will be made of a robust plastic/steel construction and tamper proof. Where further visits are required to abate the infestation this can be provided at additional cost.

After each of the site inspections we will complete a detailed report, which we will go through with you or your nominated person on site so that you are fully informed at all times of any rodent activity found and any actions required to eradicate it.

Quotation

Our most competitive quotation to provide the above service above is **£320.00**

If you require any further information please do not hesitate to contact me.

Yours sincerely

Derrick Pitter Pestforce North West London
