We would recommend a review of the design to ensure that no trees are felled and lost unnecessarily. If any have to be replaced, we would request that they are replaced like for like - the current birch trees are attractive and complementary to the design of the school building, and are of significant amenity value. The apple tree has historical significance and we would recommend that it is transplanted appropriately. Please ensure that you employ a good garden designer to ensure that the appearance of the garden is not compromised by any new building structures.
