| 2016/1313/P | Miranda Hall | 18A Kemplay Road | 10/06/2016 18:27:15 | COMMEMP ER | The plans include the intent to further dig out the lower ground (basement) to achieve additional room height of 20 cms but don't mention how much deeper than 20 cms the excavation would be required to be to achieve this. As the owner of the lower ground floor flat immediately adjacent and lower down the hill I am concerned about the potential structural impact and problems with ground water. |
