John Diver
Camden Planning Officer

7 June 2016

Dear Mr Diver,

Planning Application ref: 2016/2486/P
57 Torriano Avenue NW5 2SJ

We live at No 1 Torriano Cottages, which is directly opposite 57 Torriano Avenue. We note that a further planning application has been made in respect of 57 Torriano Avenue, and have made comments by way of an objection on the Camden website today. However the form submission on the website did not appear to allow photographs to be attached and we wanted to show you how the development with terraces overlooks our house. We were very concerned and disappointed that the original planning permission was granted with us neither being informed nor consulted about it. But at least as granted it provided for the two new roof terraces to have solidly constructed outer walls, this minimizing the visual intrusion and overlooking and providing a sound barrier.

I enclose a photograph taken from our house. We object to the application as railings and a flimsy temporary screen provide no privacy for us and are ugly and in the case of the screening can be removed in a matter of minutes. The railings will provide no sound barrier at all. The application provides pictures of the site "as approved", i.e as Mr. Costa has built it - with railings rather than a solid wall. This is highly misleading.

Please would you acknowledge receipt of this letter and photograph and please may we be kept informed as to the progress of this application.

Yours faithfully

Elisabeth Harris

Peter Davies
