2016/1630/P	C.Kemp	41 Goldhurst Terrace London	14/06/2016 01:58:12	COMMNT	<p>My huge concern is that 4 or 5 massive old trees have already been destroyed for this project...creating a loss of privacy & totally exposing properties behind the boundary wall.</p> <p>I now have views into people's living/kitchen/conservatory space, which didn't exist before.</p> <p>My issue is also being allowed to kill off green space in strict conservation area & grabbing garden space for an over-large, out of scale garden room/office, which is totally out of character with the rest of the street.</p> <p>In order to build the large dimensions requested, yet another beautiful old tree on the boundary will be in jeopardy, creating yet further exposure to overlooking buildings.</p> <p>All garden facing bedrooms in 1st, 2nd and 3rd floor flats either side of No.45 will directly overlook the new structure.</p> <p>What materials are intended to be used?</p> <p>Are they designed to blend in with the natural surroundings?</p> <p>There appears to be a new delivery in the back garden of a large pile of fresh red bricks ready to go, which if they're intended for the new build, would be totally inappropriate for the character of the surrounding properties, gardens and green space... especially as it's merely meant to be a garden room!!</p>
