Dear Sir

Tree Works in a Conservation Area  
35 Downside Crescent, NW3 2AN

I have no objection to the Eucalyptus tree being removed  
as I can see there is some disease.

However the Maple tree is a fine healthy tree and I feel  
this should not be reduced by so much but just thinned  
every so many years. We need all the trees we can about  
which I feel very strongly. Please remember we lost  
several old trees in the wood last year due to the  
fire in the Nature Reserve.

likewise the Hazel tree. Can this not be trimmed if  
necessary.

I await your decision.
