2016/2192/P	Aisling Ampadu	6 Walton House Longford Street London NW1 3PE	15/06/2016 09:14:47	OBJ	<p>I live next door to the premises and my young teenager's bedroom is located at the rear of the building, beside the proposed extension and pub space. We are situated directly above the proposed extension. The noise levels from the pub are frequently high a sit stands and require windows to be kept closed in order for my child to sleep, including summer months when it is uncomfortable to do so. The noise is often still invasive. There is also noise at the front of the building as customers sometimes gather at the front of our building and can be loud, even when the pub is closed.</p> <p>I strongly object to the proposed planning application on the basis that the additional traffic and capacity for more customers will have a great impact in generating excessive noise levels that will effect our quality of life. There is also increased potential for antisocial behaviour when there is excessive crowding and drinking.</p> <p>The pub has operated within the space it has for decades. I believe it is unreasonable to impair quality of life for people living close to the premises to accommodate solely the business interests of the applicants.</p>
