2016/2220/P	Sheena Pollet	Flat B 131 Malden Road London NW5 4HS	16/06/2016 09:15:54	OBJ	<p>Further to my previous comments, as the owner of neighbouring Flat B 131 Malden Road, I note there is a strong wind tunnel between 129 and 131, which is dangerous in high winds. It is generated from the basement well of 129's garden and currently whips up and around into 131B's garden. The application is deficient in mentioning this wind tunnel and in providing any calculations regarding the impact of the proposed works on it. Would the proposed canted glazed structure drive the wind at 131's facade, in particular at 131B's windows as the proposed structure would sit 60cm from its lounge window. This needs to be assessed.</p> <p>Yours sincerely Sheena and John Pollet</p>
