Comment: SUPPCOMP AP
Response: I support this application, subject to the comments below.
Firstly, the redevelopment of this site, and the removal of the squatters, is very important. It currently causes serious noise nuisance to me. I work from home a lot and the noise often prevents me working. The current condition of the site is unsightly, and causes dangers, which include Japanese Knotweed. These are some of the reasons why I strongly support this application which will assist the redevelopment of the site.
I live on the northwest side of the square. The houses on this side are much closer to the inside of the square than the houses on the other sides of it. The properties on other sides are also separated by gardens. This means the houses on the side I live on are subject to significantly worse noise nuisance. We hear everything that happens in the square very clearly inside our house even with the windows closed.
I understand from the applicant that the two accommodation units will normally be placed on the southwest and northeast sides of the square. They will only be moved to the northwest sides for temporary periods of up to 10 days at a time. Given this condition, I support the planning application.
