1.0 EXECUTIVE SUMMARY

| | |
|--|---|
| Site Location | 115-119 Goldhurst Terrace, London, NW6 3EY |
| Client | Hive 1 Limited |
| Proposed Development | Proposed extension of a basement beneath the footprint of the property. |
| Historic and Current Activities | From historical map evidence it would appear that the site was first built on prior to 1896. These properties were demolished prior to 1946 probably due to the result of wartime bombing. The site remained un-used until a block of residential properties was constructed between 1955 and 1960. The surrounding area has been predominately residential throughout its history, although some industrial sites including multiple garages, depots, warehouses, metal works as well as a major railway line have been present within the area. |
| Environmental Setting | <p>The 1:50000 Geological Survey of Great Britain (England and Wales) covering the area (Sheet 256, 'North London', Solid and Drift Edition) indicates the site to be underlain by the London Clay Formation at depth.</p> <p>The Bedrock geology underlying the site has been classified as Unproductive Strata.</p> <p>The site is located 313m to the west of a Zone II (Outer Protection Zone) Source Protection Zone.</p> <p>There are 4 water abstraction licences within 1 kilometre of the site. The closest is located 485m to the east of the site with the abstraction of water for the Municipal Grounds: Spray Irrigation- Direct. The permitted start date for this license is the 5th of December 2013.</p> <p>The closest surface water feature is water feature located 507m east of the site.</p> <p>The site is currently not located within 1 kilometre of an area at risk from extreme flooding from rivers or sea without defences (Zone 2) or an area at risk from rivers or sea without defences (Zone 3).</p> <p>There are no sensitive land issues within 1 kilometre of the site.</p> |
| Potential Contamination Sources | <p>On Site Sources: WW2 bombing</p> <p>Off Site Sources: Garages, printing works, warehouse, dry cleaners, metal works, leather merchants & wholesalers, perfume suppliers, wallpapers & wall coverings, digital printing, cabinet makers, railway</p> |
| Previous Investigations | There are no previous relevant investigations. |
| Potential Risks | <p>Human health: Inhalation of vapours Workforce Direct contact</p> <p>Buildings / service materials: Direct contact</p> <p>Site flora / ecosystems</p> |
| Recommendation | <p>Undertake a quantitative risk assessment (site investigation) with the following objectives:</p> <p>Provide information for further characterisation of the site in relation to potential pollution from potential Made Ground on-site and from local industry.</p> |

2.0 INTRODUCTION

2.1 Project Objectives

At the request of Elliott Wood Partnership Ltd, working on behalf of Hive 1 Limited, a preliminary risk assessment was carried out to develop an outline conceptual model and to establish whether or not there are any potentially unacceptable risks arising from potential contamination at the above site.

The information was required for a qualitative risk assessment of the potential for contamination at the site and to evaluate whether any remediation may be required for the protection of the end-user and other sensitive receptors from the presence of potential contamination.

The investigation is required by London Borough of Camden under planning regulations.

The project objectives include the following aims:

- To assess the presence, extent and nature of potential risk of pollution to end-users of the site, controlled waters and other potentially sensitive receptors.
- To undertake a qualitative environmental risk assessment of the site and surroundings.
- To identify further works, if any, needed to further assess, manage or mitigate any potential risks.
- To provide information relevant for planning approval.

2.2 Scope of works

A preliminary risk assessment comprising a Phase 1 Land Quality Assessment (a desk study and site survey) has been undertaken and is summarised as follows:

1. A review of current activities and conditions at the site based on information from the Client, regulatory data and the results of a site walkover survey.
2. A review of the history of the site and surrounding area from historical maps and available anecdotal information.
3. An assessment of geological, hydrological and hydrogeological information pertaining to the site.
4. The development of a site conceptual model identifying potential sources, pathways, receptors and linkages, a preliminary qualitative risk assessment and identification of unacceptable risks.
5. Recommendations for further works, if necessary.

The recommendations and comments given in this report are based on the information contained from the sources cited and may include information provided by the Client and other parties including anecdotal information. It must be noted that there may be special conditions prevailing at the site which have not been disclosed by the investigation and which have not been taken into account in the report. No liability can be accepted for any such conditions.

This report does not constitute a full environmental audit of either the site or its immediate environs.

2.3 Details of research undertaken

A number of database searches have been undertaken, soliciting information of the current and historical uses of the site and surrounding area in order to complete a qualitative risk assessment associated with the development of the site. These include:

- Environmental Data Search 1:10000
- Environmental Data Search 1:2500
- Site Sensitivity Maps and Data Sheets
- Historical Maps
- Local Council consultation
- Consultation with the Client / Architect / Site representatives
- Google Search

2.4 Report Limitations

This report is prepared for Hive 1 Limited (herein called the 'Client'), for purposes agreed and in accordance with the terms and conditions set out in the Agreement between Site Analytical Services Limited and the Client.

This report refers, within the limitations stated, to the condition of the site at the time of the inspections. No warranty is given as to the possibility of future changes in the condition of the site.

The comments given in this report, and the opinions expressed herein, are based upon the readily available information collated for the report and an assessment based upon the current UK guidance, primarily the Contaminated Land Research (CLR) Reports and most importantly CLR Report 11.

This report has been prepared for the sole use of the Client for the purposes described and no extended duty of care to any third party is implied or offered. Third parties using any information contained within this report do so at their own risk.

The accuracy of any map extracts cannot be guaranteed. It is possible that different conditions existed on-site, between and subsequent to the various map surveys appended.

Whilst the report may express an opinion on possible configurations of strata between or beyond exploratory holes discussed or on the possible presence of features based on visual, verbal or published evidence, this is for guidance only and no liability can be accepted for its accuracy.

The conceptual model is based on the information available at the time of conducting this assessment and is an interpretative assessment of the conditions at the site. It should be noted that the redevelopment and/or further investigation of the site may reveal additional information and therefore alter the conceptual model and the conclusion of this report.

This report is prepared and written for the use stated herein; it should not be used for any other purposes without reference to Site Analytical Services Limited. The report has been prepared in relation to the proposed end-use and should another end-use be intended a further re-assessment may be required.

2.5 Confidentiality, Copyright and Reproduction

This document has been prepared by Site Analytical Services Limited in connection with a contract to supply goods and/or services and is submitted only on the basis of strict confidentiality. The contents must not be disclosed to third parties other than in accordance with the terms of the contract.

Site Analytical Services Limited accepts no responsibility whatsoever to third parties to whom this report, or any part thereof, is made known. Any such party relies upon the report at their own risk.

3.0 SITE DETAILS

(National Grid Reference: TQ260841)

3.1 Site Location

115-119 Goldhurst Terrace is a block of residential properties, located on the eastern side of Goldhurst Terrace, Camden at approximate postcode NW6 3EY. The residential property has four levels of accommodation; ground, first, second and third floor. Balconies are present of the ground and second floor of the property with the site also comprises a communal front and rear garden.

The site covers an approximate area of 0.06 Hectares with the general area being under the authority of London Borough of Camden.

3.2 Surrounding land uses

The site is located on the eastern side of Goldhurst Terrace with residential properties to the north, east, west and south.

3.3 Site Walkover

The site was attended on 12th April 2016 for the purposes of conducting the site walkover.

The site is located on the eastern side of Goldhurst Terrace in the South Hampstead area of London NW6 3EY and comprises a three storey terraced residential dwelling separated into individual flats with front and rear garden areas.

The property has a small front garden, with a large tree and a larger rear garden which the majority was covered in vegetation, with a small hardstanding area within the south western corner. There was no noticeable slope encountered on-site.

The surrounding area is primarily residential, with no noticeable industrial or commercial uses with any potential sources of contamination.

From the walkover there are no potential sources of contamination on the site which appears to be a well maintained residential property.

3.4 Details of intended future uses of the site

Proposed extension of a basement beneath the footprint of the property.

3.5 References of planning applications

There are no recent planning applications with reference to the site on the London Borough of Camden planning portal.

3.6 Historical Maps

The site history was compiled from information available from a series of past Ordnance Survey maps (scale 1:1,250 and 1:2,500 which are presented in Appendix C).

| Date | Description |
|--|---|
| 1871 | The site comprises part of a field. The surrounding areas to the east and south of the site are predominantly residential, whilst to the west and north the surrounding areas are predominately agricultural/recreational. A pond is evident 180m to the north of the site. A railway is apparent 150m to the south of the site, running in an east, west direction. |
| 1896 | Multiple properties have been constructed on-site prior to this date and the site comprises their rear and front gardens. A major roadway (Goldhurst Terrace) has also been constructed directly to the west of the site prior to this date. |
| 1915 | The site remains essentially unchanged. The surrounding areas to the north and west of the site have become predominantly residential. Three air shafts are evident 280m to the north-east, 220m to the east and 290m to the south-east of the site. A train station is apparent 160m to the south-east of the site. An underground railway line is also evident 220m to the east of the site running in a north-south direction. |
| 1935 | The site and the surrounding area remain essentially unchanged. |
| 1946-1949 Aerial Photograph | The properties which were present on-site prior have been demolished prior to this date, leaving the site unused. This is probably due to wartime bombing. Further ruins are evident 25m to the south and 140m to the south-west of the site. |
| 1954 | The site remains essentially unchanged. Two garages, a food factory and a printing works are evident 25m to the east of the site. A metal works, a garage and a builder's yard are also evident 70m, 120m and 270m to the south of the site. |
| 1954-1985 | The site and the surrounding area remain essentially unchanged. |
| 1955 | The site and the surrounding area remain essentially unchanged. |
| 1960-1970 | A residential property has been constructed on-site prior to this date and the site comprises both the rear and front garden of this property. A warehouse is evident 35m to the east of the site. A property labelled 'works' is also apparent 95m to the south of the site. |
| 1965-1974 | The site remains essentially unchanged. A depot is evident 285m to the south-east of the site. |

| | |
|------------------|--|
| 1970 | The site and the surrounding areas remain relatively unchanged. |
| 1973-1984 | The site and the surrounding areas remain relatively unchanged. |
| 1973-1974 | The site and the surrounding areas remain relatively unchanged. |
| 1978-1990 | The site and the surrounding areas remain relatively unchanged. |
| 1984 | The site remains essentially unchanged. A garage is evident 260m to the south-east of the site. |
| 1991 | The site remains essentially unchanged. Two electrical sub-stations are evident 130m to the south and 140m to the north of the site. |
| 1992-1995 | The site and the surrounding areas remain relatively unchanged. |
| 1994 | The site and the surrounding areas remain relatively unchanged. |
| 2006 | The site and the surrounding areas remain relatively unchanged. |
| 2015 | The site and the surrounding areas remain relatively unchanged. |

From historical map evidence it would appear that the site was first built on prior to 1896. These properties were demolished prior to 1946 probably due to the result of wartime bombing. The site remained un-used until a block of residential properties was constructed between 1955 and 1960. The surrounding area has been predominately residential throughout its history, although some industrial sites including multiple garages, depots, warehouses, metal works as well as a major railway line have been present within the area.

3.7 Historical Data

Historical Building Plans Information regarding the site did indicate that there have been no areas cleared due to enemy action within 1 kilometre of the site.

Historical Building Plans Information reveal that there are no above “ground fuel tanks” within 1 kilometre of the site.

Historical Land Use Information has indicated that there were 36 Potentially Contaminative Industrial Uses located within one kilometre of the site, with 4 of these found 250m from the site. Three of these relate to railways and are located 162m to the south, 177m to the south-east and 231m to the east, dating from 1874-1991. Whilst the remaining relates to an air shaft located 233m to the east of the site, dating from 1920-1951.

Historical Land Use Information has indicated that there are 3 Potentially Infilled Land (Non-Water), located within 1 kilometre of the site. The closest is located 560m to the south of the site at relates to Unknown Filled Ground (Pit, Quarry), dating from 1991. However, it has revealed that there are 0 Potentially Infilled Land (Water) located within 1 kilometre of the site.

There are 4 Historical Tanks within 1 kilometre of the site. These are located 8 and 9m to the south-east and 41m to the north-east, dating form 1954-1967.

There are no Energy Facilities within 1 kilometre of the site.

4.0 INFORMATION OF SITE HISTORY

4.1 Present Use and Activities

There are no entries in the contemporary trade directories on-site, there are 29 within 250m of the site, 50 within 500m and 168 within one kilometre of the site.

Industrial Data

| Distance (m) | On Site | Within 250m |
|---------------------------------|----------------|--------------------|
| Current Industrial Data Entries | 0 | 29 |

Entries within 250m

| Trade | Distance (m) |
|---------------------------------|---------------------|
| Garage Services | 24m NE |
| Dry Cleaners | 65m S |
| Leather Merchants & Wholesalers | 84m S |
| Perfume Suppliers | 84m S |
| Wallpapers & Wall Coverings | 92m NE |
| Cabinet Makers | 131m E |
| Digital Printing | 122m SW |

Fuel Station Entries

There are 3 fuel stations recorded within 1 kilometre of the site. The closest is located 283m south-east of the site at 150 Loudon Road, St. Johns Wood, London, NW8 0DH and its status is currently described as obsolete.

There are no Control of Major Accident Hazards (COMAH), Explosive sites, Notification of Installations Handling Hazardous Substances (NIHHS), Planning Hazardous Substance Enforcements or Planning Hazardous Substance consents within 1 kilometre of the site.

There are 18 local authority pollution prevention and controls found within 1 kilometre of the site. 3 of these are found within 250m of the site. All three relate to dry cleaning and are located 66m and 76m to the south and 210m to the south-east of the site. The status of these three sites is described as permitted.

4.2 Landfill Sites and Waste

There are no BGS recorded landfill sites located within 1 kilometre of the site.

There is one recorded historical landfill sites located within 1 kilometre of the site and is located 593m to the north of the site

There are no local authority recorded landfill sites located within 1 kilometre of the site.

There are no registered radioactive substances within 1 kilometre of the site.

There are no licensed waste management facilities (locations) within 1 kilometre of the site.

There are no licensed waste management facilities (landfill boundaries) within 1 kilometre of the site.

There are no registered landfill sites within 1 kilometre of the site.

There are no integrated pollution control registered waste sites within 1 kilometre of the site.

There are 3 registered waste transfer sites within 1 kilometre of the site. The closest is located 561m to the north of the site at 269 Finchley Road, Camden, London, NW3. This site has a medium maximum input rate (Equal to or greater than 25,000 and less than 75,000 tonnes per year).

There are no waste treatment or disposal sites located within 1 kilometre of the site.

4.3 Radon

The National Radon Protection Board states that less than one percent of homes are above the Action Level (200Bqm⁻³). The British Geological Survey recommends that no Radon protection measures are necessary at the location of the site.

4.4 Pollution Incidents and Discharge Consents

There have been no pollution incidents to controlled waters within 1 kilometre of the site.

There have been no discharge consents to controlled waters within 1 kilometre of the site.

There are no integrated pollution controls within 1 kilometre of the site.

4.5 Identification of potential contaminants of concern and source areas

| Dates | Feature | Distance and Direction from the site (m) | Potential Contaminants | Potential impact on the site? |
|---------|---------------------------------|--|---|-------------------------------|
| 1941 | Wartime bombing | On Site | Potential Made Ground | Yes |
| 1954 | Garages | Adjacent E | Chromium, Copper, Lead, Zinc, Asbestos, pH, Oil/Fuel Hydrocarbons, Aromatic Hydrocarbons, PAH's, Chlorinated Aliphatic Hydrocarbons, Organo-lead compound's. | Yes |
| 1954 | Printing works | 25m E | Cadmium, Chromium, Copper, Lead, Mercury, Zinc, Arsenic, Selenium, Cyanide, Nitrate, Sulphate, Asbestos pH, Acetone, Aromatic Hydrocarbons, Chlorinated Aliphatic Hydrocarbons, PCB's. | Yes |
| 1960 | Warehouse | 35m E | Chromium, Copper, Lead, Vanadium, Zinc, Sulphur, Asbestos, pH, Acetone, Aromatic Hydrocarbons, PAH's, Chlorinated Aliphatic Hydrocarbons, Organo-lead compound's. | Yes |
| Present | Dry cleaners | 65m S | Cadmium, Chromium, Copper, Lead, Mercury, Zinc, Arsenic, Selenium, Free Cyanide, Nitrate, Sulphate, Asbestos, pH, Aromatic Hydrocarbons, Chlorinated Aliphatic Hydrocarbons, PCB's. | Yes |
| 1954 | Metal works | 70m S | Chromium, Lead, Nickel, Vanadium, Zinc, Arsenic, Sulphur, Free Cyanide, Sulphate, Sulphide, Asbestos, pH, Phenol, Oil/Fuel Hydrocarbons, Aromatic Hydrocarbons, PAH's, PCB's. | Yes |
| Present | Leather merchants & wholesalers | 84m S | Cadmium, Chromium, Arsenic, Sulphate, Sulphide, Phenol, Aromatic Hydrocarbons, PAH's, Chlorinated Aliphatic Hydrocarbons, Dieldrin. | Yes |
| Present | Perfume suppliers | 84m S | Chromium, Zinc, Sulphide, Asbestos, pH, Phenol Acetone, Aromatic Hydrocarbons, PAH's, Chlorinated Aliphatic Hydrocarbons. | Yes |
| Present | Wallpapers & wall coverings | 92m NE | Cadmium, Chromium, Sulphate, Asbestos, pH, Oil/Fuel Hydrocarbons, Chlorinated Aliphatic Hydrocarbons, α , β and γ hexachloro-cyclohexane, Chlorinated Aromatic Hydrocarbons, PCB's, Dioxins and furans. | Yes |

| | | | | |
|---------|------------------|---------|--|-----|
| Present | Digital printing | 122m SW | Cadmium, Chromium, Copper, Lead, Mercury, Zinc, Arsenic, Selenium, Cyanide, Nitrate, Sulphate, Asbestos pH, Acetone, Aromatic Hydrocarbons, Chlorinated Aliphatic Hydrocarbons, PCB's. | Yes |
| Present | Cabinet makers | 131m E | Cadmium, Chromium, Lead, Zinc, Arsenic, Boron, Sulphate, Phenol, Acetone, Aromatic Hydrocarbons, PAH's. | Yes |
| 1871 | Railway | 150m S | Cadmium, Chromium, Copper, Lead, Nickel, Vanadium, Sulphate, Asbestos, PAH's, Chlorinated Aliphatic Hydrocarbons, PCB's. | Yes |

5.0 ENVIRONMENTAL SETTINGS

5.1 Geology

The 1:50000 Geological Survey of Great Britain (England and Wales) covering the area (Sheet 256, 'North London', Solid and Drift Edition) indicates the site to be underlain by the London Clay Formation at depth.

The British Geological Survey maintains an archive of historical exploratory borehole logs throughout the UK. SAS Limited has searched the database and have found that there are no boreholes located within 100m of the site.

The records of the British Geological Survey indicate the following:

| Ground Stability Hazard | Risk Assessment |
|--------------------------------|------------------------|
| Collapsible Ground | Very low |
| Compressible Ground | No hazard |
| Ground Dissolution | No hazard |
| Landslide | Very low |
| Running Sand | No hazard |
| Shrinking or swelling clay | Moderate |
| Coal Mining | Not affected |

5.2 Hydrogeology

The Environment Agency Groundwater Protection Policy uses aquifer designations that are consistent with the Water Framework Directive. These designations reflect the importance of aquifers in terms of groundwater as a resource (drinking water supply) and also their role in supporting surface water flows and wetland ecosystems.

The Bedrock geology underlying the site has been classified as Unproductive Strata; rock layers or drift deposits with low permeability that have negligible significance for water supply or river base flow.

Considering the thickness of London Clay, it is considered that the potential for pollutants, if present, to interact with the underlying chalk aquifer would be minimal.

The site is located 313m to the west of a Zone II (Outer Protection Zone) Source Protection Zone.

There are 4 water abstraction licences within 1 kilometre of the site. The closest is located 485m to the east of the site with the abstraction of water for the Municipal Grounds: Spray Irrigation - Direct. The permitted start date for this license is 5th December 2013.

5.3 Hydrology and Drainage

The closest surface water feature is water fountain located 507m east of the site.

The site is currently not located within 1 kilometre of an area at risk from extreme flooding from rivers or sea without defences (Zone 2) or an area at risk from rivers or sea without defences (Zone 3).

5.4 Sensitive Land Use

There are no sensitive land issues within 1 kilometre of the site.

5.5 Summary of potential environmental receptors

| Receptor Type | Receptor(s) | Sensitivity | Comments |
|----------------|---|-------------|---|
| Groundwater | Unproductive Aquifer / Zone II (Outer Protection Zone) Source Protection Zone | Low | Due to the presence of Unproductive Strata beneath the site, the risk is low. |
| Surface water | Water Feature (507m E) | Low | Due to the distance from the site and the nature of the water feature, the risk is deemed low. |
| Flooding | The site | Low | Due to the distance from the site from zones of extreme flooding or flooding from rivers or sea without defence, the risk can be deemed as low. |
| Sensitive land | N/A | Low | Due there being no sensitive land issues within 500 metres of the site the risk can be deemed low. |

6.0 INFORMATION ON SITE DRAINAGE AND MAN MADE POTENTIAL POLLUTANT PATHWAYS

The site is currently in use as a block of residential properties and as such drainage may be present under and surrounding the site buildings, which may potentially lead to lateral or vertical migration of potential pollutants on-site.

7.0 CONSULTATION WITH THE LOCAL AUTHORITY, THE ENVIRONMENT AGENCY, ETC.

Consultation with the Local Authority was undertaken via the council's online planning portal.

Consultation with the Environment Agency has not been undertaken, however the Environment Agency have been cited within the information of the Envirocheck report.

There was no additional consultation with other bodies/sources undertaken.

8.0 REVIEW AND SUMMARY OF PREVIOUS REPORTS

There have not been any previous reports available to us at the time of writing.

9.0 OUTLINE CONCEPTUAL MODEL

In accordance with current UK guidance on land contamination risk assessment (CLR 11, Science Report – SC050021/SR3 and BS10175), the following conceptual site model has been generated for the subject site.

The purpose of the conceptual model is to identify:

- All potential source(s) of contamination at and / or within the immediate vicinity of the site.
- Any potentially sensitive receptor(s) which may be at risk from the above source(s).
- Any potential migration and / or exposure pathways which link the source(s) to the receptor(s).

Only if all three of the above elements are present i.e. a source-pathway-receptor, is a potential risk present. Such a relationship is termed a 'pollutant linkage'. The SCM describes in detail any potentially significant pollutant linkages present and justifies the exclusion of any potential pollutant linkages considered to be non-significant.

9.1 Contamination Sources

A review of the current and historical land uses indicated the potential contaminative land uses that may impact the site are similar to the following industries highlighted in DoE industry profiles for potential contaminants of concern.

On site sources:

- WW2 Bombing

Off Site Sources

- Garages
- Printing works
- Warehouse
- Dry cleaners
- Metal works
- Leather merchants & wholesalers
- Perfume suppliers
- Wallpapers & wall coverings
- Digital printing
- Cabinet makers
- Railway

9.2 Contaminants of Concern

It is considered that a number of the contamination sources are similar to those highlighted in “DoE industry profiles for potential contaminants of concern” and those likely to be of concern can be summarised as follows:

- Metals and metalloids: Cadmium, Chromium, Copper, Lead, Selenium, Nickel, Vanadium, Zinc, Arsenic, Mercury, Boron
- Inorganic Compounds: Nitrate, Sulphate, Sulphide, Complex and Free Cyanide
- Organic compounds: Acetone, Oil/Fuel Hydrocarbons, Aromatic Hydrocarbons, PAH's, Chlorinated Aliphatic Hydrocarbons, PCB's, Organo-lead compounds.
- Other: Asbestos, pH

9.3 Receptors

The receptors / resources considered to be affected by identified contamination during the assessment included the following:

- Construction workers
- Future residential users
- Building materials and services
- Site flora / ecosystems
- Off-site receptors / neighbouring residents and property

9.4 Pollutant Linkages

The following tables illustrate the hypothesised Source - Pathway - Receptor linkages for exposure to possible contaminants associated with industrial activity in the area, the current site conditions and the proposed development.

| Area of Potential Concern (and contaminants of concern) | Potential Receptor | Potential Pathway to Receptor | Hazard (Potential Consequence) | Likelihood of Pollutant Linkage | Justification / Comments |
|--|--|--|---|---------------------------------|---|
| <p>On Site Sources: WW2 bombing</p> <p>Off Site Sources: Garages, Printing works Warehouse Dry cleaners Metal works Leather merchants & wholesalers Perfume suppliers Wallpapers & wall coverings Digital printing Cabinet makers Railway</p> <p>Metals and metalloids: Inorganic Compounds: Organic compounds: Asbestos</p> | Construction workers | Inhalation, ingestion, direct contact with contaminated soil | Acute and chronic toxicity, carcinogenic impact | Possible | Significant reconstruction is planned. As such, significant groundwork would be involved in the construction process. Additional investigation required. |
| | Future users – open landscaped areas. Off-site receptors/residents | Inhalation, ingestion, direct contact with contaminated soil | Acute and chronic toxicity, carcinogenic impact | Possible | The proposed development will have areas of soft landscaping. Additional investigation required. |
| | Future users – within building footprint | Inhalation | Acute and chronic toxicity, carcinogenic impact | Possible | Ground gas generation may be possible if excess Made Ground is present on-site. Additional investigation required. |
| | Unproductive Aquifer | Contaminant leaching, vertical migration within Made Ground | Water pollution | Unlikely | The site is situated in an area of Unproductive Aquifer. No Risk |
| | Built materials and services Off-site buildings | Direct contact | Degradation | Possible | It is probable that future underground services and structures will come into contact with potentially impacted soils. Additional investigation required. |
| | Proposed flora / landscaping | Direct uptake | Phytotoxicity | Possible | The proposed development will have areas of soft landscaping. Additional investigation required. |

10.0 IDENTIFICATION OF UNACCEPTABLE RISKS

Following the hypothesised Source - Pathway - Receptor linkages for exposure to possible contaminants as identified in the site conceptual model, the following possible unacceptable risks have been identified and further investigation of the site should be undertaken to confirm or refute the risk.

| Receptor | Pathway | Nature of Risk |
|-------------------------------|--|---|
| Human Health | Inhalation of vapours | Inhalation of dust and soils (Metals, Metalloids, Asbestos, PAH, Hydrocarbons) Inhalation of vapours (PAH, Hydrocarbons) |
| | Direct contact | Direct contact with soils (Metals, Metalloids, Asbestos, PAH, Hydrocarbons) |
| | Workforce | Direct contact with soils, Inhalation (Metals, Metalloids, Asbestos, PAH, Hydrocarbons) |
| Groundwater | Unproductive Aquifer / Zone II (Outer Protection Zone) Source Protection Zone | No Risk |
| Surface water | Water Feature (507m E) | No Risk |
| Site flora / Ecosystems | Plant uptake | Direct contact with soils (Metals, Metalloids, PAH, Hydrocarbons) |
| Buildings / Service Materials | Direct contact | Direct contact with soils (Inorganics, Acids/Alkalis, PAH's, Hydrocarbons) |

11.0 SUGGESTED NEXT STEPS

The information from the preliminary risk assessment and site conceptual model has identified a number of potential unacceptable risks relating to sensitive receptors on-site.

Dependent on the scope of the proposed works on-site, it may be necessary to fully assess the potentially unacceptable risks, for which additional information would be required. We would suggest that the most viable method of assessment would be via a Quantitative Risk Assessment (Site Investigation) and the investigation would have the following objectives:

- Provide information for further characterisation of the site in relation to potential pollution from potential made ground on site and from local industry.

The scope of any such investigation should be agreed with the Local Authority, Environment Agency and any other Interested Parties prior to commencement.

Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination. For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency/Natural Resources Wales and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client.

In the attached datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination. For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client.

In the attached datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.

Historical Building Plans Information

This data set contains potentially contaminative features such as asbestos, petrol, oil and tanks captured from Historical Building Plans. The Historical Building Plans were produced by the London-based firm Charles E. Goad Ltd. as fire insurance plans, dating back to 1885. The firm ceased production of fire insurance plans in 1970. Most of the important towns and cities of the British Isles are covered. Historical Building Plans are usually at the scales of 1:480 (1 inch to 40 feet) for the British Isles. They were updated every 5-6 years by means of revision sheets designed to be pasted on to the original plans.

It should be noted that Historical Building Plans are only available for certain major towns and cities and in some cases there may only be partial coverage of the search area. It cannot therefore be assumed that the absence of responses under the Historical Building Plans section of this report indicates that no hazards exist. Please check the Historical Building Plans Map List table in the Historical Map List section of this report to establish if Historical Building Plans are available for this search area.

Historical Land Use Information

Landmark's Historical Land Use Data is the result of combined analysis of historical map data captured at 1:10,560 and 1:10,000. A unique comprehensive database of Historic Land Use from the 1840's to 1996 it includes 67 different types of potentially contaminated past industrial land use. This entailed analysing over 60,000 maps and is drawn from at least four, and up to six historical map editions. In addition a seventh layer was also created, known as the land use layer, containing areas of infilled land which are plotted via comparison between two or more map editions.

Historical Tanks and Energy Facilities

In addition to HLU, additional analysis uncovered some of the most dangerous sources of contamination (past and present tanks, petrol storage, oil, gas, electricity, miscellaneous facilities). This data set covers over 390,000 Historical Tanks and Energy facilities in Great Britain and was captured from post war 1:2500 and 1:1250 Ordnance Survey historical mapping covering a period from 1943 to 1996.
