2016/3220/T	Mr JASON ILEY	THE CHESTNUTS	25/06/2016 16:57:39	NOBJ	Having read the tree report the huge sycamore at the rear of our gardens is quite clearly diseased and rotten at the base and a worrying risk to a number of houses if it falls. This is also a concern for us as we have two children who sleep at the top of the house. The other factor to remove it is that planning permission to knock down number 17 Branch Hill has been granted. The rebuild to 17 Branch Hill will involve some considerable deep digging, vibration and disturbance. This is a concern as the new build is only a few meters away which could weaken the tree further. We are in total agreement that the tree should be removed for not only the safety of the neighbouring houses but due to the possible risk to human life should it fall down especially considering the nature of recent storms.
