Subject: Re: Householder application - 2016/3263/P - 16 Sherriff Road

Dear Tony,

The trellises would have bespoke horizon slatted western red cedar slats of 45mm width x 14mm depth. The manufacturer doesn't have specification documents for bespoke joinery.

Please find attached some images of Western red Cedar Slatted fencing which have similar fixings to the project.

Please note that the vertical posts fitted to the face of the wall to support the front trellis will not be seen from the highway and that the side trellis will not have any vertical posts (fixings on top of the wall only).

I hope this helps

Kind regards

Anne
