14 Shorts Gardens London WC2H 9AUFrom my reading of the plans, the window from the kitchen will look over the proposed location of the air conditioning unit on the first floor.I am concerned about both the noise coming from the unit as well as the addition of machinery visible from my kitchen.Whilst I accept the roof void has a number of machinery units - this specific unit has the potential to directly impact my quality of life through increased noise levels.I request that Camden Council consider a number of options to limit the noise impact from the unit including: - limits on operation of the unit in the evening and overnight - installation of secondary glazing to reduce noise coming into the kitchen - relocation of unit away from residential windows to a more suitable location on the first floor.
