Dear Sir/Madam,

Re: 21 Lancaster Grove, London NW3 4EX

Please find below a quotation for proposed tree works at the above address.

<u>SPECIES</u>	<u>WORK PROPOSED</u>
<u>Rear left</u> T3 Sycamore x 1	(<i>Acer pseudoplatanus</i>) Mature, previously reduced tree. To maintain this tree, the suggested works are: To reduce back to the previous points of reduction, clean out crown, remove deadwood.
<u>Rear right</u> T4 Apple x 2	Previously reduced trees. The suggested works are: To reduce back to the previous points of reduction, clean out crown, remove deadwood.
<u>Rear left</u> T5 Black Poplar x 1	(<i>Populus nigra</i>) Large, mature, pollarded tree. This tree is diseased, there is a large <i>Perenniporia fraxinea</i> fungal bracket at the base of the tree. This fungus causes an intense, parasitic white rot that can lead to the brittle fracture of the main stem. The foliage is sparse and undersized for the species. The suggested works are: To fell to ground level by sectional takedown.

Please quote our reference number on all your correspondence.

Yours sincerely,

Steve Hawkins, RFS Arb
