GEOLOGICAL SURVEY OF GREAT BRITAIN

RECORD OF SHAFT OR BORE FOR MINERALS

(*For Survey use only*)

6-inch Map Registered No. TQ28SE/5

Name of Shaft or Bore given by Geological Survey:

Name and Number given by owner: Whitakers brewery Hampstead road.

Nat. Grid Reference 28850 84138

For whom made

Town or Village St. Pancras. County London

Exact site

Attach a tracing from a map, or a sketch-map, if possible.

Purpose for which made Water.

1" N.S.Map No.	1" O.S.Map No.	Confidential or not
256		

Ground Level at shaft bore relative to O.D. If not ground level give O.D. of beginning of shaft bore

Made by Date of sinking

Information from Date received

				300	91·44m

London memoir II, p.88 in full.

CAMDEN TOWN. Whitaker and Co.'s Brewery (late Chance's) by the canal and Hampstead Road.

MYLNE's, "*Sections of the London Strata.*"

(45,72)

	Thickness.	Depth
London Clay - -	(42,67) 140	140 (42,67)
Reading Beds and Thanet Sand	(21,34) 70	210 (64,01)
Chalk - - -	(27,43) 90	300 (91,44)
	(85,95)	

SIR H. BESSEMER told me that the depth was 282 feet, and that at a depth of about 150 feet there was a thick bed of marine shells, with wood (much pyritized) and shark's teeth. This must be the basement-bed of the London Clay.
