Informative(s):

- 1 Reasons for granting listed building consent

The proposed glazed winter garden at the rear would appear as a lightweight addition to the host building such that it would be possible to discern the original building. Revised plans have been received during the course of the application to ensure that the new glazed structure does not cut through the existing openings and header bricks on the host building and it is considered that the structure would respect and preserve the original design and proportions of the building, including its architectural period and style. The architectural and historic special interest of the rear elevation would be unharmed by the proposed structure, which could be cleanly removed in the future.

The proposed structure would be supported by structural glass beams, and on three sides by a lightweight steel structure set within the containing yard wall; glass roof panels will meet the rear elevation of the house directly on the fourth side supported by a slim steel bracket. All the connections would have lead flashings, set into existing mortar joints, with no harmful impact on the historic fabric of the building.

No objections have been raised in relation to the works. The application site's planning history and relevant appeal decisions were taken into account when coming to this decision.

Special regard has been attached to the desirability of preserving the listed building and its features of special architectural or historic interest, under s.16 of the Listed Buildings and Conservation Areas Act 1990 as amended by the Enterprise and Regulatory Reform Act (ERR) 2013.

The proposed development is in general accordance with Policy CS14 of the London Borough of Camden Local Development Framework Core Strategy, and Policy DP25 of the London Borough of Camden Local Development Framework

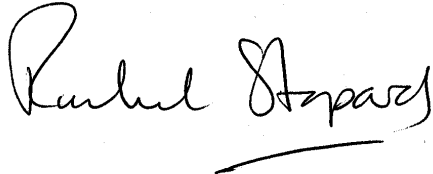

Development Policies. The proposed development also accords with Policy 7.8 of the London Plan 2016; and the provisions of paragraphs 14, 17, 56-66 and 126-141 of the National Planning Policy Framework 2012.
