

56-58 FREDERICK STREET, LONDON WC1X 0ND

DESIGN, ACCESS HERITAGE STATEMENT

The Listed Building application relates to the basement flats in 56-58 Frederick Street.

1. Site Analysis

56-58 Fredrick Street are five-storey terrace properties (including basements and attic) built during the first half of the 19th Century (c.1830) by Thomas Cubitt. They are Grade II listed and in the Bloomsbury Conservation Area.

Extracts from 'Bloomsbury Conservation Area Appraisal and Management Strategy'
– Adopted 18 April 2011:

Calthorpe Street/Frederick Street.

This sub area is situated on the eastern edge of the Bloomsbury Conservation Area, east of Gray's Inn Road, and abuts the boundary with the London Borough of Islington. It comprises an area of mainly terraced housing built on the Swinton and Calthorpe Estates to the east of Gray's Inn Road, an historic route dating back at least to Medieval times. It is one of the few parts of the Conservation Area that has a noticeable fall from west to east, being on the west side of King's Cross Road which follows the valley of the now culverted River Fleet. The northernmost part around Swinton Street was developed in the late 18th century following the construction of New Road (now Euston Road) and a small suburb to the north of this area around Battle Bridge. The remainder of the area was developed over the period 1820 to 1850 by the builder Thomas Cubitt who had his yard in this area. A notable pattern is the progression of development from west to east and the gradual variation in the detailed treatment of the frontages. In the 1860s the excavation for the new Metropolitan Railway cutting bisected Swinton Street and Acton Street towards their eastern end.

Most of the buildings in this area date from the 1820s to the 1840s, and were designed and built by Thomas and William Cubitt. 19th century development progressed from west to east, although there have been some areas of post-war redevelopment. There is slightly greater use of stucco render in these quieter streets. There is generally a grander, classical approach to the overall composition of elevations, which boast pilasters, pediments and projections, emphasising the design of the terrace as a single composition (particularly evident on Frederick Street). Several terraces in this area have entrance porticos at street level giving greater architectural significance, a feature not seen in the streets to the north.

The properties are part of a portfolio of properties acquired by Community Housing Association in the 1970's in Frederick Street, Ampton Place and Ampton Street. 56-58 Frederick Street was converted into flats during the early/mid-1980s.

2. Development Objectives

One Housing Group is intending to carry out a series of repairs and improvements throughout the majority of their properties in the immediate vicinity (i.e. Frederick Street, Ampton Street and Ampton Place). Generally, the works will consist of the essential renewal of the services (mechanical and electrical installations), kitchen fitting and bathrooms together with all other necessary repairs. Improvements to the internal layouts of the maisonettes, flats and bedsits may also be proposed on a property-by-property, unit-by-unit basis.

56+58 Frederick Street are among several properties being upgraded in the fifth phase.

3. Design Solution and impact on heritage assets

Listed Building Consent and Full Planning Permission have been granted for a number of alterations to the two basement flats (application ref: 2015/6800/L & 2015/6442/P).

A further Listed Building consent is being sought for the following alteration and repair to the basement flats:

- Right hand flat (N° 56) – minor alteration involving the removal of the non-original flush door and frame forming the redundant lobby between the existing bedroom and en suite shower room and minor adjustment to adjacent shower room and store cupboard doors and frames
- Left hand flat (N° 58) – installation of steel downstand beam located directly beneath the ground floor joist supporting the staircase partition at ground, first and second floor levels (the single timber joist has been confirmed by the structural engineer as structurally inadequate and requires strengthening)

The proposed alteration and repair are discreet and they have no adverse impact on the listed building.

4. Access

Not applicable.

5. Affect on neighbours

Not applicable.

6. Landscaping

Not applicable.

7. Appendix

English Heritage List Entry Summary for 54-72 Frederick Street.
