

First Floor Plan of Courtyard

Typical Upper Floor Plan

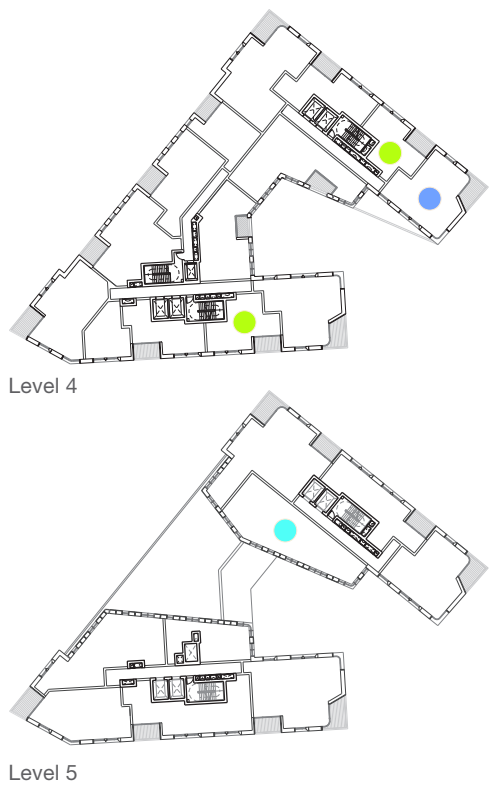

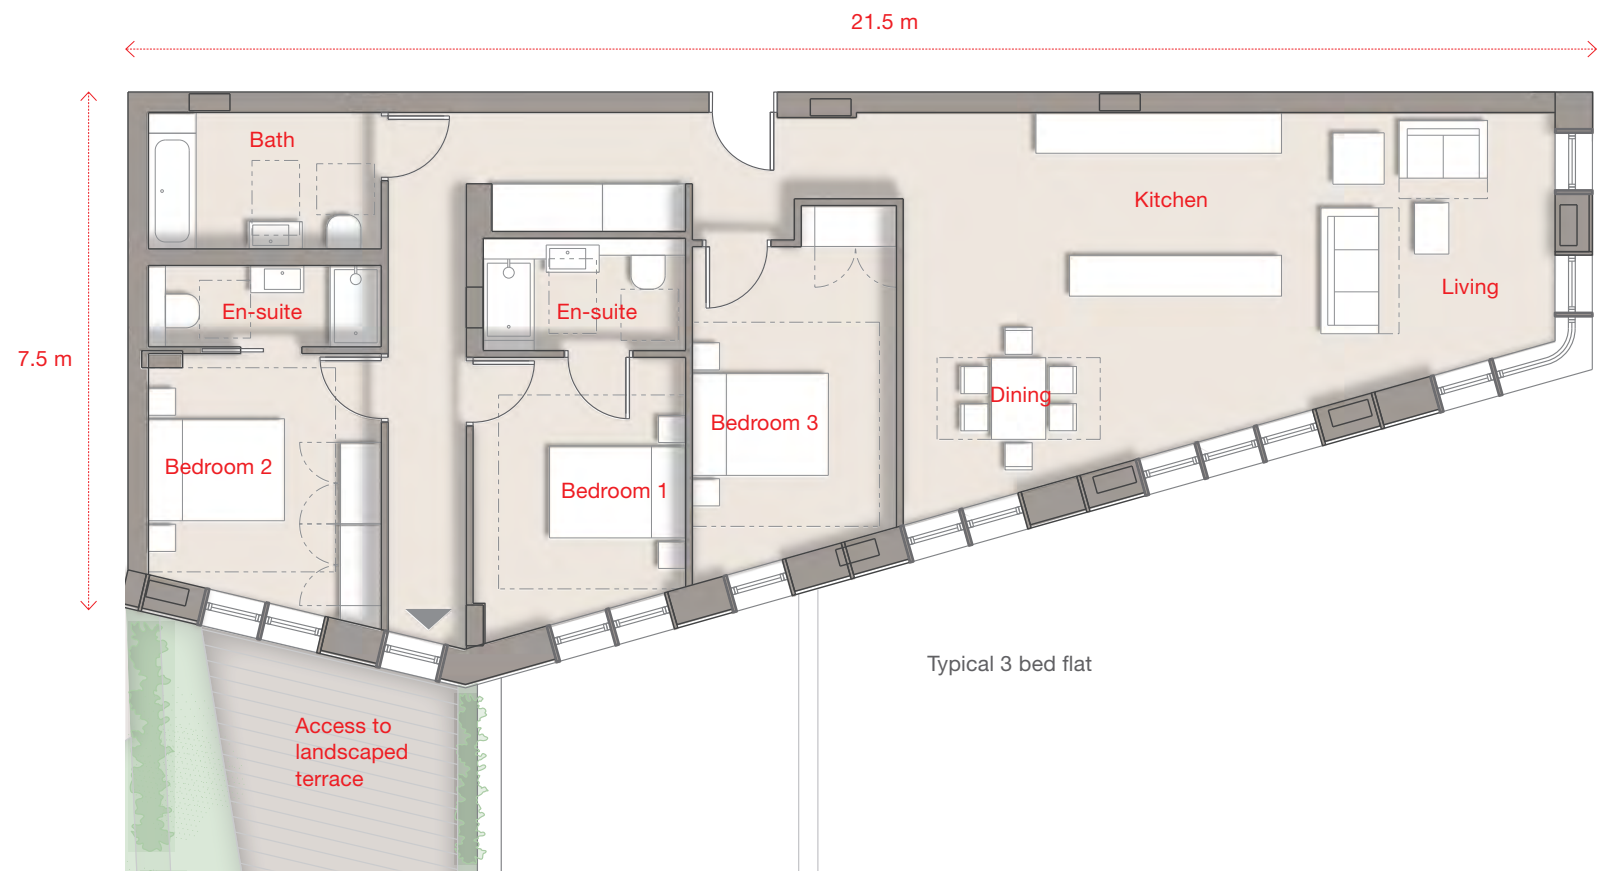

## 4.9 Typical Apartment Layouts - Blocks A & B

The residents enter into either an open entrance hallway leading to the main living space or directly into the living space which benefits from views and natural light.

External amenity areas are provided for all the units (except studios). The majority have large (typically 2.2m x 3.7m) inset balconies. Units on the upper levels open out onto landscaped roof terraces.

By locating dropped ceilings and cooling units in secondary areas (circulation, bedrooms and bathrooms) the soffit to the living areas can be kept clear resulting in generous floor to ceiling heights.
