To find your property select your preferred search option, then enter the appropriate details in the box.

Summary valuations shown represent the valuation officer's approach to assessing rateable value. Whilst the RV shown will be in line with any agreement or tribunal determination, the actual build up may differ. This will be where, exceptionally, the VO has been able to agree/accept the RV but not the build up or where, for technical reasons, it has not been possible to replicate the agreement or decision. Whilst areas used are believed to be accurate, you should take steps to make your own measurements when checking RVs.

No liability is accepted for their use for other purposes.
