2016/3270/P	Elisabeth Kocen	127 Willifield Way NW11 6XY	18/07/2016 16:32:58	COMMNT	<p>As Hon Sec for 6 Frogna Management co, I should like to object strongly to this application. We are most concerned about subsidence during the building work and in the years immediately following such a development.</p> <p>We should be contacted by the owner of Flat 1, 8 Frogna, for him to authorise us to have our own structural survey done now at his expense.</p> <p>We are also extremely concerned that the developer would use the woodland at the back of the house for access. This would lead to loss of wildlife and be detrimental to the whole area.</p>
2016/3270/P	Samin Kashfi	flat 7 6 Frogna	19/07/2016 10:18:45	OBJLETTE R	<p>I am very concerned about the possibility of subsidence and would be interested to know if Camden Council will take a joint responsibility with the owner of flat 1 regarding future subsidence. A property developer purchases a property, makes a shoddy extension and then sells on the property to a new owner. Those of us who have lived in Camden for many years (in my case 18 years) will then have to carry the can due to the short sightedness of Camden Council.</p> <p>In addition the woodland at the back of the gardens in Frogna has a wildlife which must be protected in particular the owls. Council has a duty of care towards the wildlife. I understand the property developer intends to utilise a path through the woodland to gain access to his garden flat for the extension.</p>
