re Planning Application Consultation Ref 2016/3435/P

I am writing to object to the proposal for the  
Erection of single rear extension at  
7, Lyncey Gardens, London, N.W.6. U.K.

It would cause a loss of amenity.

Instead of seeing greenery and open space we will  
see a solid structure.

It will alter the view from our kitchen window  
(which is not as depicted on the plan) Instead of light  
I will have darkness.

I wish to conserve the aspect and amenity we  
have now.

My husband, Mr. Gordon D. Scarfe is receiving  
twenty four hour care in our ground floor front  
room.

Being able to sit quietly in our garden has been  
vital to maintaining my mental well being at  
this difficult time in our lives.

2.

The structure will be too close to our boundary.

It will cause harm to the setting in a conservation area

There is some risk that a flat roof could be accessed by upper floor residents.

The extension would be a blight on this property.

Yours faithfully
